COURSEWORK

COMPUTER SCIENCE

Data Structures

Principles of Programming Languages Software Development Methods Design + Analysis of Database Systems Algorithms

Introduction to Artificial Intelligence Information Visualization

EXTRACURRICULAR

Full-Stack Web Development iOS Development C++ Development VR Development Computer Graphics Programming Unix Tools and Scripting

SKILLS

PROGRAMMING

Over 25000 lines:

Node.js • Express.js • React.js MongoDB • JavaScript • Python C • C++ • CSS • HTML • EJS Git/Github • RESTful APIs • jQuery Swift • PostgreSQL • Redux Familiar:

Linux • iOS • XML • MySQL • C#

RELEVANT PROJECTS

PERSONAL PORTFOLIO WEBSITE | GITHUB REPO

April 2021

 Design and maintain a website using React.js, Node.js, and Express.js to display my portfolio of work created over my academic career.

MERN SHOPPING LIST | GITHUB REPO

March 2021

- Developed as a practice project to put my knowledge of the MERN stack together.
- Modernized the source code and rebuilt it from the ground up with JSX.
- Full-stack Application Utilizes MongoDB/Mongoose, Express.js, React.js, and Node.js to display a real time database of grocery items. API built with Express to connect to MongoDB.

WHISPERS CLONE | GITHUB REPO

February 2021

- Developed a Web Application that allows users to securely log into their accounts and post secrets to a MongoDB database.
- Built with Bootstrap, EJS, Node.js, Express.js, and Mongoose/MongoDB. Utilizes Passport.js to salt and hash users' login info for secure storage on an Atlas server. Includes Google OAuth 2.0 functionality for easier login.

WIKI-API | GITHUB REPO

March 2021

- Simple RESTful API built using Node.js and Express.js. Data stored on remote MongoDB Atlas server.
- Integrated GET, POST, PUT, PATCH, DELETE functionality for articles found on the server.

WORK EXPERIENCE

PROJECT ENGINEER | LAYTON CONSTRUCTION

May 2016 - Jan 2018 | Denver, CO

- Managed a crew of 25 to 40 construction workers to successful implementation of project plans.
- Executed large-scale renovations of hospitals in the Denver Metropolitan Area.
- Oversaw the extensive and sensitive operations for risk assessment containment within the hospitals.
- Led the daily meetings with the subcontractors to establish project priorities

MARKETING INTERN | UNITED INTERESTS RECORD LABEL

Nov 2014 - Mar 2015 | Boulder, CO

• Conducted detailed market analysis on consumer demand (album sales and streaming trends) within various locations in the US, to inform tour destination choices and maximize potential ticket sales.

FINANCE INTERN | UBS INC.

May 2014 - Aug 2014 | Newport Beach, CA

- Researched markets and securities to advise client investment decisions
- Synthesized findings into detailed written reports for the team.
